4 LAYOUT FOR TABLES, FIGURES AND EQUATIONS

Tables, Figures and Equations are to be numbered continuously. Tables and Figures are numbered independently.

4.1 Tables

Insert Headings of tables on top of the table. Table headings have the following format (Template “Table”, “Remark”, “Source”). According to the supervisor, the “source” can be introduced in footnotes.

Table 1: Political Variables in the Milk Sector

Remark:

5 CITATIONS AND REFERENCES

The type of citations within the text can differ between chairs at the ILR and **needs to be specified by the supervisor**. In the following, we will introduce two different types of citations:

Academic papers written at the chair of Technology and Innovation Management in Agribusiness (Prof. Dr. Stefanie Bröring):

All the citations within the text should be introduced in footnotes – including the name of the author, year and the page.

Quotation marks are used within a document to denote the actual words spoken or written by an individual. Indirect quotes should not be enclosed in quotes.

Each citation within the text has to have a number which refers to the literature source located in footnote. The reference in the footnote has to include the name of the author, year and the page number. Please use semicolon, if there are several references within parentheses.

Example (indirect citation):

The concept of involvement refers to the level of perceived personal relevance or interest evoked by a stimulus, which the consumer links to situation-specific goals.²

Example (direct citation):

“A person's perceived relevance of the object based on inherent needs, values, and interests”³.

Please use semicolon if there are several references within one footnote and use either alphabetical or chronological order of the references consistently.

In case you use the name of the author(s) within the text, please put it small captions and indicate the particular citation again within a footnote.

Example:

HAUSCHILDT further argues that an innovation project, in order to qualify for the term innovation, must at least advance to the stage of market introduction of a new product or usage of a new process in production.⁴

² C.f. Zaichkowsky (1985), p. 59.

³ Zaichkowsky (1985), p. 59.

⁴ C.f. Hauschildt (2004), p. 25.

Academic papers written at the chair of Production Economics (Prof. Dr. Robert Finger):

Literal quotations should be written in quotation marks with a following reference. E.g. „Die Landwirtschaft weist einige charakteristische Eigenschaften, jedoch keine grundsätzliche Sonderstellung im Rahmen des marktwirtschaftlichen Systems auf“ (HENRICHSMEYER and WITZKE 2002, pp. 428-429). References without literal quotation should also be marked in the text: MEADOWS (1998, p. 8) wisely says that an environmental indicator... or: Some work was recently devoted to indicators and measurement of quality of life (COBB 2000).

Please, no footnotes for the pure indication of a source.⁵

Example for citations:

(MÜLLER 1996)	General Reference.
(MÜLLER 1996, p. 23)	Reference, related of one page.
(MÜLLER 1996, pp. 23-24)	Reference, related of two pages.
(MÜLLER 1996, pp. 23-28)	Reference, related of more than two pages.
(MÜLLER 1996a, p. 23)	Reference, if there are in one year two or more published books/papers by the author (a, b, c, ...).
(MÜLLER 1989, 1993)	Reference, if you use more then one publication by the author.
(MÜLLER, E. 1996)	Reference, if two authors have the same name.
(MÜLLER and MEIER 1996, p. 23)	Reference with two authors.
(MÜLLER et al. 1996, p. 23)	Reference with three or more authors.
(N.N. 1996)	Reference, if the author is unascertainable.

Please use semicolon, if there are several references within parentheses.

(MÜLLER 1990, p. 101; MEIER 1996)

Please use small captions if the author is named in the text and set the year specification in parentheses.

„Nach MÜLLER (1996, p. 101) kommt den gesamtwirtschaftlichen Rahmenbedingungen eine herausragende Bedeutung zu.“

⁵ If necessary, footnotes could be used for extra explanations which are not essential for the general understanding of the text. Related to this it is also possible to give additional references.

If institutions or organisations are named as author, please use also small captions.

INSTITUT FÜR AGRARENTWICKLUNG IN MITTEL- UND OSTEUROPA (1996, p. 123).

Please follow general principles for literally citation:

1. Set the citation in quotation marks.
 2. Changes of the citation will be unacceptable, also if the syntax is wrong. Exceptions:
 - It will be allowed to correct obvious misprints.
 - Footnotes of the cited text could be disregarded.
 3. If a word (or several words) in a quotation are omitted set two (three) points instead. The points can be omitted, if the quotation consists only of few words of a sentence.
 4. Additions and explanations of a quotation are to be set in parentheses.
 5. Quotations within a quotation are to be marked by single quotation marks.

Secondary Sources:

A secondary source is a document or recording that relates or discusses information originally presented elsewhere. A secondary source contrasts with a primary source, which is an original source of the information being discussed. It is principally not allowed to cite secondary sources! Only in the exceptional case, if it is not possible to procure the original document, a secondary source is acceptable! Both authors should be recorded in the references:
